ABOUT ME

Full-stack Software Engineer with 4+ years of experience designing and delivering scalable web applications and high-performance APIs across 10+ projects for Vietnamese and French companies. Adept at working in cross-cultural, distributed teams of 3–10 members and adapting quickly to diverse technology stacks as well as business domains.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL, Scala, HTML/ CSS **Backend:** .NET Core / .NET 6+, Node.js

Frontend: Vue.js, Quasar Framework, Buefy, Three.js **Databases:** SQL Server, Azure CosmosDB, Firestore

Cloud & DevOps: Microsoft Azure, Firebase, Docker, Github Actions **Testing:** Gatling, xUnit, Jest, Vitest

Tools: Git, Scrum/Agile, Scriban Template Engine, Debezium (CDC)

WORK EXPERIENCE

Full-stack Software Engineer Logi VietFrance Company, Vietnam

Aug 2022 – Present

- Migrated ~50+ UI components from Vue 2 to Vue 3 to improve rendering performance and align codebases.
- Refactored a 15k+ line legacy microservice to Clean Architecture.
- Built and optimized APIs powering a maritime Port Community System used by freight forwarders across 4 continents.
- Synchronized order data with 2 third-party logistics platforms using Message Queues and multi-protocol modules (REST, SOAP).
- Delivered an interactive 3D barge loading visualization using Three.js, Vue 3, Quasar, and Firebase.
- Authored Gatling load-test scripts simulating 500+ concurrent users before production release.
- Collaborated directly with French business analysts to translate domain requirements into technical specifications, working across 2 time zones with a 5-member distributed team.

Full-stack Developer (Intern) SOGET S.A. Company, France

May 2022 – Aug 2022

- Maintained 3 legacy shipping apps; developed container order API features and a real-time tracking service using .NET.
 - Created Gatling scripts to simulate high-traffic scenarios and checked for any bottlenecks.
 - Developed Barge loading plan application, one of the few tools that help port operators reduce their time by generating optimized loading plan in 3D.
-

Full-stack Developer (Intern)
Logi VietFrance Company, Vietnam

Feb 2022 – Apr 2022

- Implemented UI for order creation features (Vue2, Buefy) and C# backend services; improved third-party integration throughput.
 - Contributed to prototype for 3D Barge loading plan.
-

EDUCATION

Bachelor's Degree in Software Engineering

2017-2022

Danang University of Science and Technology

- Classified: Very Good | GPA: 8.21/10
 - 2018–2019: Awarded 2 academic excellence scholarships
-

ADDITIONAL INFORMATION

- **Skills:** User Story Management, Communication/ teamwork, Problem solving, Researching
- **Languages:** English, French
- **Certifications:** TOEIC 970/990 (2022), DELF B2 (2021)
